

# Phase 3 Notes

## 19 April

Did some research on Camunda

Explored more about the platform

Where is modeler task-list and some basic functionalities

## 20 April

Modelled the sub-process for automation in Camunda

Explored how to add XOR gate conditional statements

Ran the instance and deployed the process

## 21 April

Made a form for the user task

Added some more forms in the model

Deployed the model with forms and completed the instance

## 22 April

Studied about Rest APIs

How to make an instance with Rest call

Added a dummy API for a sub-process task
